Art Unit: 2665

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4-13, drawn to a method and apparatus for performing handoff of a mobile station between different radio access networks, classified in class 455, subclass 436.
 - II. Claims 2 and 3, drawn to a method for compensating a handoff in a packet data serving node, classified in class 370, subclass 331.
 - III. Claim 14, drawn to a method for routing data packets between an IP network and a radio access network, classified in class 370, subclass 349.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of inventions II and III has separate utility such as handoff controlling device and data packet routing device. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2665

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
